Sustainable Development Committee

The Sustainability Development Committee was established in 2020 to supervise operations related to ESG and sustainability reporting. The TWSE Chair serves as the Committee Leader, and the TWSE President serves as the Deputy Committee Leader. The Senior Executive Vice Presidents and department heads serve as committee members, so as to effectively integrate resources and implement sustainable strategies through each department. In the case of major issues, two board directors/supervisors may be invited to participate in committee discussions.

Five working groups were set up within the Sustainable Development Committee to set policies, targets, and activities to promote sustainable development. In 2025, a total of one Sustainable Development Committee meeting and 12 project progress meetings on Constructing Taiwan's ESG Ecosystem were held. From the feedback of the directors, the TWSE will continue to refine its sustainability practices and reporting. Each year, the company updates the Board of Directors regarding sustainability policies, implementation status, and performance through the TWSE Sustainability Report, in order to enhance the overall knowledge, capabilities, as well as experience of board members in sustainable development issues.

Organization and responsibilities of the Sustainable Development Committee

Committee Leader
